By SEAGULL SCIENTIFIC

BarTender 2019 Edition Features

DIFFERENCES IN FEATURES BETWEEN THE BARTENDER 2019 EDITIONS

BarTender feature concepts

create

dynamic data

automate

manage

Available BarTender 2019 editions

BarTender 2019 Free edition

- A single, global, and upgradable license for all BarTender installations in the networked organization
- High performance BarTender print engine
- Ideally use with optimized Windows printer drivers by Seagull
- Document design using Intelligent Templates
- Create labels, cards, and tags with text, barcode, picture, and drawing design objects
- Licensed for printing to two different printers per week

BarTender 2019 Professional edition

PROFESSIONAL EDITION

Print from spreadsheets and databases, create forms for entering manual data faster, encode RFID tags and smart cards.

For departments and small businesses looking to print from databases, spreadsheets and data entry forms. All features of the **Free** edition plus:

- Standard data entry forms for variable print time data
- Extensive data sourcing capabilities with data files, database etc
- Full support for RFID and Smart Card capable printers
- Print to electronic documents (PDF)
- Connection to local System Database for logging
- Integrated role based security that leverages Active Directory
- Recent (7 days) print job logging, and message logging
- Licensed for printing to X number of different printers per week

BarTender 2019 Automation edition

AUTOMATION EDITION

Combine forms, actions and system integrations to build a powerful automated printing solution.

For businesses looking to increase efficiency by automating their printing and integrating with other systems. All features of the **Professional** edition plus:

- Intelligent Forms with actions
- Integration Platform for rapid deployment of automated printing for business systems such as SAP, Oracle, and others
- .NET APIs for programmatic automated printing
- BTXML Script
- SAP certified and Oracle validated integrations
- Recent (7 days) print job logging with reprint capability

BarTender 2019 Enterprise edition

ENTERPRISE EDITION

Manage, secure and control your entire enterprise label system, whether in one location or across continents.

For organizations that require complete connectivity and full, centralized control of their printing environment. All features of the Automation edition plus:

- Web App for printing via a web browser and over the internet
- Mobile Apps for printing from Android and iOS devices
- Centralized System Database for all BarTender installations
- Full print job and message logging (local or remote) with reprint
- Document management with version control with Librarian
- Security logging, electronic signatures, and document encryption
- Printer device and consumable management and tracking
- Printer redirection for critical print jobs

Edition products in summary

ENTERPRISE EDITION

Manage, secure and control your entire enterprise label system, whether in one location or across continents.

For organizations that require complete connectivity and full, centralized control of their printing environment.

AUTOMATION EDITION

Combine forms, actions and system integrations to build a powerful automated printing solution.

BarTender 2019 Companion Applications

ADDING EXTRA VALUE TO THE BARTENDER SOFTWARE

BarTender companion app distribution

Enterprise Edition

- Printer Maestro
- Print Portal
- Librarian

Automation Edition

- Integration Builder
- Reprint Console
- Process Builder

Professional Edition

- Administration Console
- Data Builder
- History Explorer
- Print Station

Administration Console

Administration Console provides management and configuration settings for most applications within the BarTender Suite.

- Manage security and user permissions
- Monitor deployed integrations
- Manage printer licensing
- Create printer redirection scenarios
- Create BarTender specific default printers

| Printer Setup | Security > User Permissions | | | |

Data Builder

No database? No problem. Build your own database directly in BarTender.

- Store and manage your data using this intuitive database tools
- Make dynamic documents by connecting BarTender designs to your Data Builder database files
- Save numerous types of data in Data Builder database files which includes images
- Add multiple tables to a Data Builder database file

| Home | ∓ Fields | Da | tabase 1* - BarTender | r Data Builder | | ۰ | 8 |

History Explorer allows organizations to review logged data that will help drive

Print Station

Simplified printing interfaces improve production speed and cut down on human error. Print Station's configurable interface will provide you with improvements in both.

- Create an easy-to-use application to simplify the print operator's job
- Allows the use of interactive print-time dataentry forms
- Manage security so print operators do not adjust settings or edit templates

Integration Builder

- Create an integration that meets your needs!
- Automate label production by integrating BarTender label printing with your ERP, WMS or other business system.
- SAP, Oracle, Infor, Epicor, and more!

22

Reprint Console allows you to easily reprint identical copies of previously printed documents.

 Reprint an entire batch of labels or pick and choose individual labels from the batch to reprint.

Reprint Console

- View thumbnail images of printed labels for easy identification.
- Highly regulated environments require a way to view label print history to check for accuracy.
 - Ex. medical device manufacturers

Process Builder

Process Builder allows you to create label printing applications and one click processes without knowing how to code.

- Create a series of processes that may print multiple BarTender documents with the single press of a button.
- Create actions that print one or more BarTender documents.
- Change the requested printer in response to user input or selections.

across your network.

- View live status of printers located throughout your network
- View active, recently completed or canceled print jobs
- View events and create alerts for printer related events such as an error printing
- Configure the tracking of printer-related inventory

Printer Maestro offers a convenient way to monitor printers and print jobs

BarTender Print Portal

Powerful web-based printing directly from a browser or mobile app to any connected printer.

- Add/manipulate data in real time using BarTender data entry forms
- Automatically authenticate with a Print Portal site
- Print to Bluetooth or IP printers directly from your Android device
- Print to IP printers directly from your iOS device
- BarTender security controls monitor access and permissions to labels and documents

Barlender

Proprietary and confidential. Do not copy or disseminate.

Librarian

Librarian allows multiple users to cooperatively and securely manage the storage and revision of BarTender documents.

- Create a configurable workflow for the revision of documents and label designs.
- Assign individual users or groups roles within the workflow.
- Documents that have made it through the workflow are known as "Published" documents.
 - Published documents are ready for production.
